pulldown

Ergonomic and fast control for every application in assembly and workshops

- Grey cast-iron frame resistant to vibrations
- 2-speed, highly effective motor/gearbox
- Hardmetal guiding of saw band
- Smooth angle cutting from 0° to 60°
- Quick and easy adjustment of angle
- Robust vice with lever for quick clamping
- Removable swarf tray

Large and well-readable angle scale helps to easily adjust the angle for mitering.

Robust and strong clamping vice ensures large surface area for clamping material. Device for fast clamping saves time when repeat cutting.

Easy adjustment of angle directly from controlling side provides for the highest possible flexibility.

Large range of roller conveyors and accessories is available.
