**AUTOMATIC OPERATING MODE** : The purpose of the automatic program is to minimize the operator mistakes by recording the bending degrees. In this mode, you only need to press the pedal and wait for the bending to finish. The machine will automatically go to next step.

**Red Arrow** : Every program has 10 steps, Machine memorize 99 program in their memory.

**Blue Arrow** : Every steps has correction factor for precise bending.

**Green Arrow** : After selecting the desired program from the **purple arrows**, the operator must save the selected program to activate it.
